3. Installation, Configuration, and Licensing

3.1 Is Autodesk Design Suite available as a stand-alone and network license?

Yes, Autodesk Design Suite is available for both stand-alone and network licensing. Licensing is handled through standard Autodesk licensing processes using Autodesk Licensing Manager (ADLM). Customers who purchase multiple network licenses for suites that have common products and are only able to access a subset of prior version copies can get their full prior version entitlement by contacting their reseller or visiting <https://registeronce.autodesk.com> to have the licenses reissued.

3.2 Do all products in Autodesk Design Suite need to be used on the same workstation?

Yes, the software applications within an Autodesk Design Suite license can only be installed on a single computer. They cannot be split across multiple workstations.

3.3 How do I activate my software?

Through the activation and registration interface, you can activate your product 24 hours a day, seven days a week, over the Internet or via email. Either option takes only a few steps to complete and requires your product serial number and registration information.

3.4 What if I have more than one computer? Can I use my software on multiple machines?

Autodesk recognizes that some users may need to operate the software when they are away from their usual work location. To accommodate this need, the product activation technology allows an employee to install the software on a second computer owned by the employee's company, provided it is for use away from the employee's usual work location, the software is used only by that employee and no other, and only one of the two copies of the software is ever in use at any one time. Consult the Autodesk Software License Agreement for details about using the software on a second computer.

3.5 Where can I find more information about software activation?

More information on product activation can be found at www.autodesk.com/activation.
