

# Revit Health Check

Get it. Know it. **Use it.**

**An Ideate Revit Health Check provides an unbiased and accurate assessment of a project model and suggests changes that will benefit both the project under review, the firm, and future modeling practices.**

## Who Can Benefit from an Ideate Revit Health Check?

Architects, engineers, contractors, and project teams who have finished models and projects and who have felt frustrated during the design process will benefit from an Ideate Revit Health Check.

## Do You Encounter These Common Challenges?

- “Our model’s too large; our models have errors; we are losing productivity gains.”
- “I am working with other firms and need to streamline the process.”

## Streamline Processes and Improve Workflow

- Avoid making the same errors and losing productivity gains.
- Improve the process for the next time.

## Optimize Your Revit Model

We invite you to understand the benefits of having a Revit Health Check. Ideate will work with you to identify key elements within your Revit model and modeling processes that may be optimized. We review errors and challenges when building your model and provide detailed solutions to problems that hold your team back from producing the best and most efficient Revit model.

## Deliverables

- One-day of offsite review by Ideate Technical Staff
- A 1/2 day onsite meeting with project team to review Revit Health Check findings and to train staff on future Quality Control processes
- Revit Health Check Report (PDF) outlining the findings and any recommended action items

## Fees Start at \$2500-\$3000

Customer to provide the project RVT file with any related CAD links (additional RVTs may increase cost)

an Ideate Revit  
Health Check.**

## “The Ideate consulting was great!

Everybody was very happy with the information that we got. David Haynes was very knowledgeable and gave us a lot of practical feedback on how to approach our next project. It was just what we needed and I speak for everyone who attended, when I say it was time well spent. We will definitely think about doing this sort of thing again at the end of our next Revit project or even at major benchmarks.”
