ADVANTAGE PACKS:
MORE POWER TO YOU**

Autodesk® Subscription customers already enjoy access to exclusive tools, training, and web support through Subscription Center. But now there's even more.

Autodesk® Subscription Advantage Packs are now available for 2010 Autodesk software. They provide Subscription customers with early access to the latest product enhancements—boosting productivity and offering a significant competitive edge.

With new features and specialized functionality, tools, and content that are fully compatible with the latest software release, Subscription Advantage Packs help you benefit from the latest capabilities. And, they can be downloaded from Subscription Center.

To download a Subscription Advantage Pack, sign in to Subscription Center today at:

Subscription Advantage Pack for Autodesk® Navisworks® 2010

The Subscription Advantage Pack for Autodesk Navisworks 2010 extends the capabilities of Autodesk Navisworks 2010 software in the areas of interoperability, productivity, and file distribution

FEATURES AND BENEFITS

1. General Enhancements—Support for the Autodesk® FBX® file format improves interoperability between Navisworks 2010 and other Autodesk products, while a new batch processing utility offers improved productivity for existing Navisworks users.

Autodesk FBX File Format Support—Support for the Autodesk FBX file format improves interoperability between Navisworks 2010 and a range of other Autodesk products, including Autodesk® Maya®, Autodesk® 3ds Max®, and Autodesk® Softimage® software. Users can import FBX data for viewing and analysis in Navisworks 2010, and also export projects in the widely-used, platform-independent format. Capabilities include:

- Import and export of FBX file format
- Support for FBX geometry, plus some properties and textures
- Ability to combine files from multiple design applications into a single project model in Navisworks 2010, and export the integrated model into 3ds Max for professional visualization

Batch Processing Utility—The new batch processing utility offers improved productivity for Navisworks 2010 users. It supports the automation of common tasks such as generating lists of files, combining files, and converting files. Users can schedule the time of batch processing to optimize allocation of resources. Capabilities include:

- File List produces a text file containing a list of the paths and file names of all design files used in an integrated model
- File Combine enables users to automatically import a batch of files of any supported format into a single model
- File Convert enables users to automatically convert a batch of supported files into individual Navisworks files

2. NWC Export Utility—The distributable NWC Export Utility enables Navisworks 2010 project teams to generate whole-project models for simulation and analysis. Users can distribute the exporter so that project team members can generate the optimized NWC file directly from their design applications. This capability is provided without necessitating a licensed seat of Navisworks 2010 on the same machine. The NWC exporter works with a range of products, including:

- AutoCAD-based products
- Revit-based products
- Autodesk 3ds Max software
- MicroStation® software
- ArchiCAD® software

The NWC file format supports transfer of both object geometry and associated metadata from the design applications into Navisworks 2010.

PRODUCT COMPATIBILITY

The Subscription Advantage Pack for Autodesk Navisworks 2010 works with:

- Autodesk® Navisworks® Manage 2010
- Autodesk® Navisworks® Review 2010
- Autodesk® Navisworks® Simulate 2010
- Autodesk® Navisworks® Manufacturing Manage 2010
- Autodesk® Navisworks® Manufacturing Review 2010
- Autodesk® Navisworks® Manufacturing Simulate 2010
- Autodesk Education Master Suite 2010
- Autodesk Education Suite for Architecture & Engineering 2010
- Autodesk Education Suite for Civil & Structural Engineering 2010

LANGUAGES AVAILABLE

The Subscription Advantage Pack for Autodesk Navisworks 2010 is available in:

- English
- Chinese (Simplified)
- French
- German
- Italian
- Japanese
- Korean
- Portuguese (Brazilian)
- Russian
- Spanish

Subscription Advantage Packs can be downloaded by signing in to Subscription Center. For more information visit www.autodesk.com/advantagepacks.
