INTRODUCING

IDEATE + IMAGINiT ONLINE EDUCATION

We are committed to helping our customers across the globe get the most out of their software investment.

Ideate + IMAGINiT's online education platform offers a variety of highly interactive, live, instructor-led courses without expensive travel costs or significant interruption to daily business operations. Our top-rated Autodesk-certified instructors build on real industry experience to ensure students leave class confident in their new skills and ready to implement their new knowledge.

FEATURED ONLINE COURSE TITLES INCLUDE:

Revit Architecture Fundamentals

Focuses on the design and documentation process within Revit to reinforce Architectural workflows **\$995**

Revit Fundamentals for Interior Architecture

Focuses on the design and documentation process within Revit Architecture to reinforce Interior workflows **\$995**

Revit Architecture Families

Features how to create stable Architectural component families and how to modify them to enhance graphic quality **\$495**

Revit MEP Families

Teaches introductory methods for assigning and testing graphical elements and parametric data within a Revit MEP component family **\$495**

AutoCAD Beyond the Basics

Expands on the basic functions in AutoCAD to enhance one's skills and productivity **\$595**

AutoCAD Advanced

Features advanced AutoCAD concepts and sophisticated techniques to extend one's mastery of the software **\$495**

Stay tuned for additional class titles coming in 2018.

Each online course is scheduled over a series of (4-hour) virtual sessions. Call for more information about scheduled dates and course availability.

In order to register for online education courses, students must have access to the class version of the software and meet all noted system requirements.

CLASSROOM TRAINING

Ideate + IMAGINiT offers a wide array of classes to suit the needs of engineers, architects, designers and drafters. Class size is limited in order to maximize interaction, provide hands-on learning and ensure individual attention. Many courses qualify for professional development hours (PDHs) under AIA guidelines.

AutoCAD Fundamentals ⁽³⁾

Three-day course covering the basics of AutoCAD, a leading design and drafting software

Civil 3D Fundamentals ⁽³⁾

Three-day course covering the basics of using Civil 3D for creating, analyzing, and managing civil engineering drawings and projects

Civil 3D for Surveyors ⁽²⁾

Two-day course covering how to effectively use Civil 3D in a typical survey workflow

Navisworks Fundamentals ⁽²⁾

Two-day course covering the essential tools in Navisworks to enable coordination, construction simulation, and whole-project analysis for integrated project review

Revit Architecture Fundamentals ⁽³⁾

Three-day course covering the fundamentals of designing and modeling buildings within an intelligent, integrated Building Information Model

Revit Structure Fundamentals ⁽³⁾

Three-day course highlighting the features of Revit Structure and its varied tools for parametric building design and documentation

more classes →

Revit MEP Fundamentals ⁽²⁾

Class series covering the basics of designing MEP systems within an intelligent, integrated building information model (BIM)

Revit MEP Electrical (2 days)

Revit MEP Mechanical (2 days)

Revit MEP Piping & Plumbing (2 days)

Revit MEP Fundamentals courses are sold as two-day classes: Day 1 highlights an overview of the MEP platform, and corresponding days are broken out by discipline. Extra days can be purchased for those interested in multiple disciplines.

Revit Architecture Families ⁽¹⁾

One-day course covering the fundamentals of creating and testing parametric content within Revit Architecture

Revit Architecture Beyond the Basics (Class Series)

Class series geared to take your Revit Architecture skills to the next level; purchase individual days or bundle together for a comprehensive course covering multiple workflow and advanced topics

Revit Architecture Enhanced Modeling & Techniques (1 day)

Revit Architecture Collaboration & Coordination (1 day)

Revit Architecture Model Management & Presentations (1 day)

PRICING INDEX:

- (1) One-day course = \$495
- (2) Two-day course = \$895
- (3) Three-day course = \$1195

CUSTOM TRAINING

Need custom training curriculum, location or timing? Ideate + IMAGINiT can help.

Our custom training offers a convenient and affordable way for you to train several of your employees at the same time. We can work with our existing curriculum or customize it to focus on specific needs and questions relevant to your workflow. In addition to our standard class offerings, sample custom course titles include:

BIM for Contractors

BIM Management for Revit Architecture

Revit for Project Managers

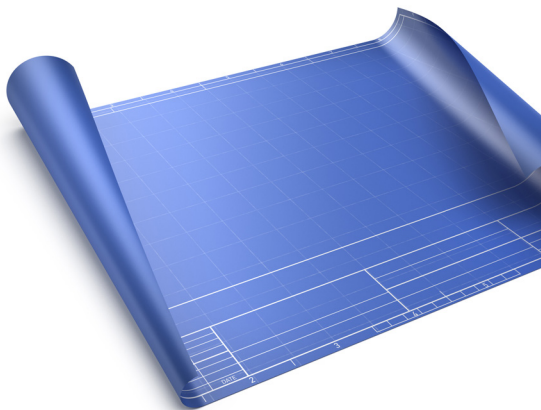

Revit Architecture for Landscape Design

AutoCAD Update

Whether in person at one of our **Autodesk Authorized Training Centers**, or in your office, your employees will benefit from our proven, interactive, hands-on approach. We also offer mobile training labs if needed to create a quality off-site training location. Please call for custom training rates and additional information.

“ I appreciate that Ideate was flexible with customizing the course to fit my company’s needs. It was productive to add lab time to work on our company’s families.”

— *Case Engineering/
Malisa Brooks*

WHY TRAIN WITH IDEATE?

We are invested in our student's success

Your learning doesn't stop when you leave class. To ensure your confidence in your new skills, we extend all training with 90 days of free follow-up support for course material. Many courses also qualify for professional development hours under AIA guidelines.

We offer multiple learning platforms

Take advantage of the type of learning which works best for you and choose from one of our varied training methods (classroom, custom, online or eLearning).

We believe in blended learning

Ideate + IMAGINiT's varied package offerings include access to several of our training platforms, offering maximum retention with increased flexibility. Our learning paths offer predefined steps for continued development and maximum product knowledge.

We make learning fun

Going beyond basic picks and clicks training, we offer interactive curriculum with a mix of lecture and hands-on exercises. Courses highlight sample projects emphasizing real-world, practical applications.

We feature award-winning, top-rated instructors

With a 95 percent student approval rating, our Autodesk-certified instructors are architects, engineers, and specialists who have a combined total of 136 years of teaching experience and an average of 18 years of industry experience.

We offer state-of-the-art training facilities

Our five training centers offer comfortable classroom settings with top-of-the-line computer systems and up-to-date Autodesk software applications. Come ready to learn, and we will take care of the rest (coffee and snacks included). Mobile labs can be rented for offsite training requests.

Employee development is an integral investment in today's rapidly evolving AEC industry. Learning the full potential of Autodesk software can be your firm's biggest asset.

With Ideate + IMAGINiT's varied training offerings, firms can maximize their Autodesk software investment, keep staff up-to-date with new software functionality and pave the way for continued growth and development.
